THE ROLE OF NUTRITION IN BRAIN DEVELOPMENT

A seminar sponsored by The Norwegian Brain Council and the Norwegian Consortium on Brain Development

Friday November 13, 2015
Kl. 1300-1700
Store auditorium, Rikshospitalet

Program:

1300-1315  Joel C. Glover
University of Oslo
Welcome and introduction

1315-1400  Joel C. Glover
University of Oslo
“Developmental milestones and mechanisms in the brain and their potential susceptibility to nutritional status”

1400-1445  Melissa Gladstone
University of Liverpool
“Food for thought – how does nutrition affect brain development?”

1445-1530  Christian Drevon
University of Oslo
“Optimal nutrition for the brain perinatally”

1530-1615  Birgitta Strandvik
Karolinska Institute
“The importance of neonatal fatty acids for the development of prematurely born babies up to 18 months of age”

1615-1645  Farrukh Chaudhry
University of Oslo
“Patho-functional roles of amino acids in brain development and neurodegenerative diseases”

1645-1700  Discussion

See also the associated public event “Mat og Hjernen” (in Norwegian) sponsored by the Norwegian Brain Council (Hjernerådet) – November 12, 16:30-18:30, Vulkan Arena, Oslo- in connection with the public campaign “Med hjerte for hjernen” (on Facebook).
