Program for School of Health Innovation

Health Innovation and Entrepreneurship course, spring 2019

School of Health Innovation is a collaborate initiative between UIO, NTNU and KI. We aim to provide life science researchers and clinicians with tools and insight into how innovation can be put to work for the benefit of patients, the healthcare system and our society. We have since 2017 delivered courses to life science phds, post-docs, clinicians and professors from our Nordic universities.
