Greetings from the Director

In response to the health challenges of a global world and in line with calls for more efficient knowledge production towards the Sustainable Development Agenda 2030, the scale of Global Health research has grown both in Norway and worldwide.

The idea that researchers from different fields should work in collaboration has reconfigured health research, with the view that Global Health research plays a significant role in

addressing disparities in Global Health. The Faculty of Medicine (MedFac) at the University of Oslo (UiO) aims to be at the forefront of this movement, striving to address the Global Health challenges of today.

The Centre for Global Health (CGH) is an initiative of MedFac, hosted by the Institute of Health and Society (HELSAM). The focus of CGH is to support and link the existing knowledge base of Global Health research at MedFac to relevant networks, human and financial resources, while further strengthening Global Health research capacity within the university. Another key function of CGH is to disseminate information to the wider community of researchers, decision makers and the public, while enhancing the Global Health profile of MedFac through high quality events, communication and reporting. In addition, active participation of CGH in national Global Health forums and international networks further supports and develops the role of MedFac in these organisations, both in terms of research collaboration and promoting access to novel and innovative funding sources.

Thus, CGH is committed to advance Global Health through a) offering integrative contribution to *research activities* by supporting *researchers directly*; b) fostering *education* by teaching, supporting and supervising post-graduate students; and, c) investing in *administration of and assistance* with events, proposals and projects, all related to Global Health.

My team and I strive to maintain a stimulating platform for dialogue and action to address Global Health challenges. We are grateful for the support from MedFac, HELSAM, CGH Steering Committee, the Technical Advisory Board and UiO rectorate, as well as our partners and networks. We are looking forward to a busy and fruitful 2019.

Prof. Andrea S. Winkler

Director of the Centre for Global Health, University of Oslo

Research activities

Developing and strengthening collaboration and communication between researchers at the university is a strategic activity for improving research efficiency and outcomes. In order to facilitate networking and communication between research groups with common interests, CGH has consolidated existing Global Health research at UiO into virtual Signatory Themes.

The 13 Signatory themes at the Centre for Global Health

The themes are designed to represent current research and adapt to the changing environment and priorities within Global Health. They provide access to information on who is active in Global Health at UiO and function as a portal for Global Health projects and events for internal and external users.

Consolidation

After initial two years of establishing a comprehensive Global Health platform at MedFac/UiO, CGH in 2018 developed a consolidation plan for the next 5 years. Within this plan, CGH have a specific focus on **capacity development in Global Health research and education** at MedFac/UiO by:

1. *Supporting innovative and upcoming research groups that have more of a national focus and are in an early phase but have the potential for excellence, high impact and long-term sustainability.*

Relight: A new support program for Global Health research groups at MedFac, named Research Excellence and Innovation in Global Health (**RELIGHT**) with a focus on **Global One Health**, **Global Digital Health** and **Global Antimicrobial Resistance** was launched in the fall of 2018 for start-up in 2019.

The support for these upcoming, young research groups will include a strong level of involvement in terms of mentoring, with a focus on grant writing. The program aims to foster a stronger global health focus on those nationally already strong groups, link people and groups into relevant research environments that can compete for the larger funding schemes.

2. *Ensuring long-term sustainability of already successful Global Health research groups.*

The Norwegian Global Health landscape has a longstanding commitment to global maternal & child health and infectious diseases. As a consequence, we have a well-established sexual & reproductive health as well as an infectious diseases hub with a strong support base at MedFac. CGH commits to offering mentorship, strategic advice, travel support, event organizing and institutional backing to selected groups.

Recruitment

CGH is committed to supporting researchers and staff in Global Health through direct employment. Part-time administrative have been funded to support the day-to-day activities of CGH and activities affiliated with CGH, such as the NORPART EXCEL SMART project¹. In 2018, CGH has recruited academic and administrative staff into employment positions and has recruited a variety of students to help out at the various events.

Academic recruitments 2018

- One Health PhD (Muhammad Asaduzzaman to start in 2019)

Administrative recruitments 2018

- Nicoline Lokdam: Replacing Øystein Røynesdal in a 50% position from February-June incl. 30% for CGH, from July in an 80% position working mainly on maintaining CGH's webpages and supporting the administration of CGH, including strategic work
- Philippa Druce: Assigned for 4 months in 2018 for fundraise for and coordinate the One Health Lancet Commission as well as support with articles, applications and communications
- Christine Holst: (PhD candidate in Digital Health at UiO) January-February administrative support x 25%
- Ekaterina Bogatyreva: Public Health researcher, 2.5 months x 80 %

Education

Nested within an academic environment, CGH is committed to developing and expanding Global Health education.

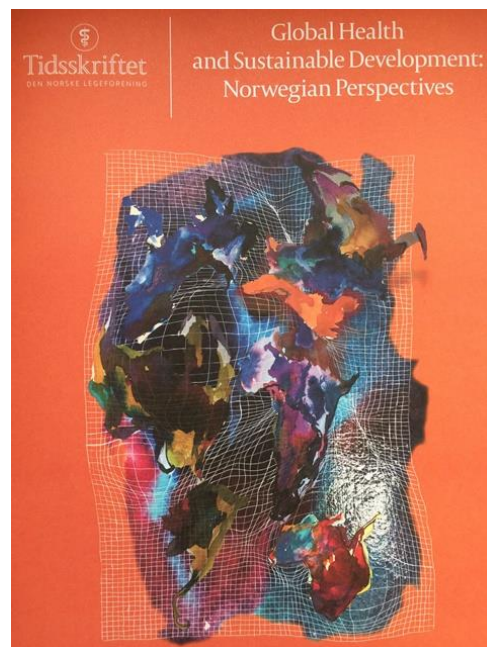

A week-long Global Health course for PhD candidates of MedFac was organised by Heidi Fjeld and Andrea Winkler in the spring of 2018, with several of the CGH network members as teachers. In addition, lectures on Global Health have been included in the introductory course of the PhD programme at MedFac and the Masters programme of International Community Health at HELSAM.

In order to increase engagement of students and staff interested and working on Global Health related projects, the PhD seminar for Oslo-based Global Health PhD candidates led by Johanne Sundby is meeting regularly- the Global Health Student Network. It offers candidates a platform to present their work, receive critical feedback, and discuss research administration, such as registration and ethics. It also offers opportunities to become engaged in other projects at the university, receive advice from experienced academics while creating a supportive environment of Global Health researchers.

The article series on Global Health in collaboration with CGH, the Norwegian Agency for Development Cooperation (Norad) and the Journal of the Norwegian Medical Association

22 articles have been published in the Journal of the Norwegian Medical Association from 26 June 2017 until 2 January 2018, profiling Global Health research in topics including infectious diseases, neglected tropical diseases, mother and child health, nutrition, health and the environment, health inequalities, migrant health, universal health coverage, health service delivery, health personnel training, health in conflict, Global Health financing and student involvement in Global Health.

A selection of articles was published in a special edition as hard copy early 2018.

The Norwegian Research School of Global Health

CGH actively engages with the Norwegian Research School of Global Health (NRS GH; with Johanne Sundby as one of the board members) and participated in the PhD conference organised in April 2018 in Oslo. The NRS GH aims to strengthen the quality of post-graduate education and facilitate recruitment of young researchers in Global Health. Current partners of the NRS GH include the Norwegian University of Science and Technology (NTNU), the University of Tromsø, the University of Bergen, the Norwegian Institute of Public Health and UiO. The research school also supports other PhD activities, and helps to finance PhD students to attend courses, national and international conferences.

The NORPART EXCEL SMART project

The NORPART EXCEL SMART project is a strategic academic collaboration between Jimma University, Ethiopia (JU) and UiO, funded by the Norwegian Centre for International Cooperation in Education (SIU). The project is nested within CGH. The overall aim of the EXCEL SMART project is to enhance the quality of higher education in Ethiopia, and to expand and strengthen the academic cooperation between JU and UiO through student and academic staff exchange.

In 2018, the EXCEL SMART project group and the leadership staff at JU and UiO worked closely to plan, set up and prepare the educational and academic activities in the program. EXCEL SMART assisted four PhD and two MPhil candidates in preparing their applications to UiO study programs, and granted four mobility scholarships to medical and Master students travelling to JU. They hosted one PhD candidate from JU in August who will work with Profs. Kristin Heggen and Eivind Engebretsen, UiO, on his PhD studies. EXCEL SMART also had the pleasure of hosting Dr. Legese Chelkeba, Dean of the Health Sciences Institute, JU and Gudina

(Photo: Øystein Røynesdal/UiO)

Terefe Tucho from Department of Environmental health science and Technology, JU at the 2nd Annual Jimma seminar at Tøyen Hovedgård.

The seminar had speakers from JU and UiO presenting the plans for the new One-PhD programme at JU, as well as research portfolios and course work implemented at JU in collaboration with Norwegian Programme for Capacity Building in Higher Education and Research for Development (NORHED): Strategic And Collaborative Capacity Development in Ethiopia and Africa (SACCADE).

(Photo: Øystein Røynesdal/UiO)

The EXCEL SMART project is finalizing a MOOC (Massive Open Online Course) in How to Write a PhD Proposal led by Prof. Anne Moen. The MedFac granted additional funding to the development of the MOOC in 2018. It is developed in collaboration with colleagues from LINK – Centre for Learning, Innovation & Academic Development and UniMedia, and includes lectures with academic staff from JU and UiO. The MOOC will be launched in the beginning of 2019 on the FutureLearn platform where it will be available to forthcoming PhD students worldwide.

Communication

Communication is at the core of CGH. The focus for the communication activities in 2018 has been on reaching a broad audience of students, researchers and clinicians in Global Health via social media, webpages and organised events. We also actively outreach to potential funding mechanisms and the policy community. As part of the communication strategy and to ensure a professional and updated interface internally and externally, CGH is continuously enhancing and updating the UiO website and Facebook pages with reports and activities to serve the faculty, staff, students, alumni, partners and affiliates of CGH.

CGH organizes a range of seminars and conferences, some in collaboration with partners and individual researchers. Through our network activities, we strive to create meeting places for the Global Health community at large, enabling researchers and global health professionals to engage in dialogue, learn about new developments and link to policy makers.

Global Health Unpacked Series

The Global Health Unpacked Series with the Centre for Development and the Environment (SUM) offers a meeting place that has been welcomed by the Global Health researchers at UiO. The aim is to bring together the Global Health community on a regular basis to critically discuss key debates in Global Health through informal seminars. Guest speakers (both from the UiO and from other universities) bring an original perspective to their topic and engage in a conversation with the audience. Through this forum, CGH facilitates exchanges between Global Health researchers and students present in Oslo, beneficial for fostering interdisciplinary research.

(Photo: SUM (UiO)/UNMEER)

Women in Global Health Norway

CGH is a strong supporter of gender equity in leadership, especially in Global Health, where women make up the majority of the workforce. There is global recognition that promoting women's health is a strategy to improve the health of populations and make progress towards the Sustainable Development Agenda 2030.

The Women in Global Health Norway launch, November 2018 (Photo: Øystein Horgmo/UiO)

CGH is taking the initiative in hosting the Norwegian chapter of Women in Global Health (WGH), a platform for dialogue and collaboration that links the Centre and University to broader networks and alternative funding sources.

The platform was launched on November 26th with a social and professional event, including a panel debate with some of Norway's most prominent women within Global Health and gender rights work.

Promotion material

Newsletter

The newsletter aims to provide readers with a brief and up-to-date summary of activities, linking to most recent event reviews, and providing information for upcoming events and funding opportunities. It is also used as a platform for showcasing PhD and other research projects affiliated with CGH. Within 2018, through direct sign-up, the number of newsletter recipients increased from 731 to 1138 recipients.

Annual and interim reports

In order to demonstrate the activities and functions of CGH and to reach our network and future collaborators, CGH produces regular annual and interim reports along with regular activity updates.

Internet visibility from 2017 to 2018

Facebook

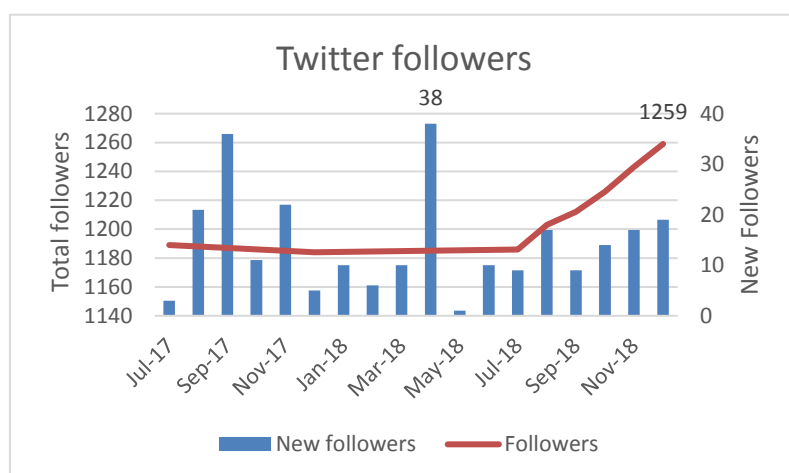

The CGH uses Facebook as a key platform to disseminate Global Health-related content relevant to our followers, mainly events, research publications, study- and job opportunity. Our following has been consistently increasing with increasing activity.

The UiO Global Health page on Facebook, 2017 – 2018

Twitter

CGH communication team harnesses the Twitter platform to communicate information real-time. This allows our followers who are unable to attend an event to stay current with front-line research and keep up with speakers' key messages and Global Health research priorities. Further, it ensures our visibility at key events and links CGH to influential institutions.

Twitter followers, July 2017 – December 2018

UiO webpage

The CGH webpages at UiO continued its high level of activity in 2018 with 31.638 visits in 2018.

Visits to the CGH webpage, 2016 to 2018

Events and Seminars in 2018

CGH has hosted 24 events in 2018, including the Global Health Forum 2018 in April in close collaboration with Global Health Norway partners. Particular achievements include our active participation at Arendalsuken, hosting our annual Global Health Inspiration Day, our series with SUM called Global Health Unpacked, and the launch of the Women in Global Health Norway platform on November 26. This event was followed by the Global Mental Health Day 2018 on the 28th, and finally in December, a seminar on sexual violence as a weapon of war, honouring the winners of the 2018 Nobel Peace prize award, in collaboration with The Peace Research Institute of Oslo (PRIO).

See a list of all events 2018 in the appendix 1.

Scientific publications

The researchers affiliated to the Centre for Global Health have a comprehensive scientific publication record within the field of Global Health. Below are the numbers of scientific publications from 2016-2018 by 15 of our core researchers. The publications are divided into level 1 and 2, according to the UiO ranking of the journals they were published in.

Global Health research publications by 15 of our core affiliates to the Centre for Global Health, published from 2016-2018 and sorted into level 1 and 2 according to the journal they published in. The 15 researchers represented are: Andrea S. Winkler, Johanne Sundby, Christoph Gradmann, Espen Bjertness, Ahmed Ali Madar, Unni Gopinathan, Per Ole Iversen, Trygve Ottersen, Nanna Lien, Kåre Moen, Britt Nakstad, Heidi Fjell, Anne Ma D. Riise, Ruth Prince, Bernadette Kumar

Funding grant applications

(Photo: Pixabay)

CGH has taken a lead on or has been involved in 20 applications for exclusive and joint funds in 2018 and 44 from 2016 - 2018 (Table 1).

Of the total 18 successful applications from 2016-2018, the majority came from external sources (14) and some were internal distributions from MedFac (4) (Table 2).

For detailed grant applications see appendix 2.

Table 1: Funding grant applications 2016-2018

Year	No. of approved applications (No. of applications sent)	Funds received (Total sum applied for)	Funds to Medical Faculty Institutions
2016	5 (8)	20 850 000 (49 740 000)	8 110 005
Institute of Clinical Medicine	1		300 000
Institute of Health and Society	4		7 810 005

Implementation

Core Group

CGH's day-to-day activities are run by a core group that consists of the Director, Professor Andrea S. Winkler, and the Coordinator, Ms. Ingeborg Haavardsson, with support from the Deputy Directors, Professor Johanne Sundby and Professor Christoph Gradmann.

Support staff

An administrative group of part-time support staff provides technical and administrative assistance to ensure the smooth running of CGH. In addition, CGH is relying on administrative resources made available by the MedFac and UiO.

Steering Committee

CGH is led by a Steering Committee that advises the core group and can make strategic decisions based on majority rule. The Steering Committee meets once to twice a year.

Prof. Frode Vartdal
Dean, Faculty of Medicine, UiO
(leader of the committee)

Prof. Flemming Konradsen
Director, Copenhagen School of
Global Health, University of
Copenhagen

Prof. Camilla Stoltenberg
Director-General, Norwegian
Institute of Public Health

Prof. Per Ole Iversen
Institute of Basic Medical
Sciences, Division of Clinical
Nutrition, UiO

Prof. Johanne Sundby
Institute of Health and Society,
UiO

Deputy of Prof. Stoltenberg:
Dr. Bjørn Gunnar Iversen
International Health, Norwegian
Institute of Public Health

Technical Advisory Group

Each Signatory Theme has a leader who functions as the liaison between the CGH core group and the research activities at UiO. The leaders form a Technical Advisory Group that together with Winkler and Haavardsson meets at least once per year.

Assoc. Prof. Trygve Ottersen
Health systems & global governance

Prof. Espen Bjertness
Non-communicable diseases
