

UiO : Faculty of Medicine

University of Oslo

Description of Position – Professor II at the Institute of Health and Society

The Institute of Health and Society (HELSAM) at the Faculty of Medicine, University of Oslo, bases its work on a complex understanding of the interconnectedness of sickness, health and health systems. Research, teaching and service at the Institute focuses on the complex interaction of policy, culture, environment, society, and biology. The Institute seeks to recruit a Professor within the field of Global Health, a 20% faculty position to be allocated to the Department of Community Medicine and Global Health and be tied to the Medical Faculty's Center of Global Health.

According to the regulations at the Faculty of Medicine, the person appointed will lead and initiate research, supervise researchers, participate in teaching students and research fellows and undertake duties in connection with examinations, as well as undertaking administrative tasks as required by the prevailing regulations. The Faculty is responsible for teaching (including conducting examinations) for the programmes of professional study in medicine/dentistry and the faculty's bachelor and master programmes. The Faculty is also responsible for providing organised research training. The professorial duties include teaching these groups, including non subject specific supervision tasks, such as PBL-groups (Problem Based Learning) in accordance with the current needs of the faculty, within by the guidelines for working hours in professorial positions. The person appointed is expected to participate in adjudication committees for PhD theses, assessment committees regarding appointments and competence promotions, and to take the role as acting dean in disputations.

The Department of Community Medicine and Global Health is mainly responsible for teaching and supervising in the Master's program International Community Health, in the PhD program and in the Faculty's medical education.

The Institute of Health and Society aims to strengthen its research capacity in 'one health' in low-and middle-income countries. We seek candidates with a medical degree who have extensive research experience in global one health on issues that should include poverty-related diseases of the infectious as well as non-infectious nature, neglected zoonotic diseases with the ensuing one health concept, and digital health.

High ambitions and quality of teaching, research and communications is expected.

The successful applicant will have a plan for development of her/his research, and for acquiring externally funded research projects. High quality of research, and publishing in peer-reviewed international journals is expected. The applicant is asked to describe his/her research profile, with respect to strategic plans and existing research at the institute/department.

Within 6 months after appointment, the successful candidate must provide a three-year plan for future research in line with the institute's/department's strategic priorities. The plan is to be presented to the head of institute/department.

Strong interpersonal skills and the ability to create an attractive research environment will be emphasised. Active collaborations, both interdisciplinary and internationally, are expected.

The basis for the assessment of the applicant will include the education and training, scientific production and quality, professional and academic experience, teaching experience and qualifications as well as the documented experience in administration and management. As part of the ranking of qualified applicants, the full scope of these qualifications will be explicitly assessed. Particular weight will be attached to qualifications that are central to the job

description. Educational and scientific qualifications will carry more weight than other qualifications. Originality and innovation will be given priority before volume, and recent publications will be weighted higher than older.

In the final review and recommendation, emphasis will be laid on skills related to the job description, the evaluation provided by the assessment committee, evaluation of personal suitability for the position based on interviews and references obtained, pedagogical qualifications and ability to disseminate scientific knowledge, plans for further research and ambitions for his/her teaching.

Applicants who at the time of appointment cannot provide documentary evidence of basic teaching competence, must acquire such competence in the course of a period of two years.

Applicants who are not competent in Norwegian, Swedish or Danish must acquire such competence within two years subsequent to their appointment, and must be highly competent in English in the interim period.

As a main rule, interviews will be held and references collected, and the applicants will normally be required to give a trial lecture.

The University of Oslo wishes to appoint more women to permanent academic positions. Women are encouraged to apply. The University of Oslo also wishes to appoint more people from ethnic minorities to permanent academic positions. Women and minorities are encouraged to apply.

The University of Oslo has an intellectual property agreement that applies to all employees, with the aim of securing rights to research results etc.
