

Table 3.9 Results of fitting the logistic regression model of low birth weight (LOW) on history of hypertension (HT) and weight of the mother at the last menstrual period, $n = 189$.

	Estimate	SE	z	P	95% CI
HT	1.856	0.7010	2.65	0.008	(0.4816, 3.2294)
LWTKG	-0.041	0.0145	-2.83	0.005	(-0.0695, -0.0126)
constant	1.451	0.8210	1.77	0.077	(-0.1584, 3.0597)
