

**Refnr:2019/11408**

**Professor II/Associate Professor of Medicine (Cardiology) at the Institute of Clinical Medicine, University of Oslo, combined with a full-time Senior Consultant position at the Department of Cardiology Ullevål, Division of Medicine, Oslo University Hospital. Externally funded by Oslo University Hospital.**

The Institute of Clinical Medicine has a vacant position as Professor II/Associate Professor (20%) at the Department of Cardiology Ullevål. The vacant position is a part-time professorship (20%) combined with a full-time (100%) senior consultant position at the Division of Medicine, Oslo University Hospital.

The main research areas at the Department of Cardiology are clinical research in the field of acute myocardial infarction, acute heart failure, anti-thrombotic treatment, and arrhythmias, but research on biomarkers, more translational research and research within the field of epidemiology and risk factors are also performed.

The applicant is expected to have comprehensive experience in clinical research within the field of cardiology. We look for an applicant with extensive research experience within the field of cardiac ultrasound, or alternatively, within the field of arrhythmias/cardiac device developments.

She or he is expected to have ongoing research activity at a high international level and to be able to obtain research funding from external sources. Ability to create an attractive and stimulating academic environment within the Department and to attract PhD students and postdocs is essential. Furthermore, the applicant is expected to contribute actively to collaboration projects, both nationally and internationally, and have a keen ability to develop the discipline towards novel scientifically-based high standards in order to improve patient care.

The main position and the part time position are combined. It is a requisition that the position holder attends to both positions. If the main position is left, the part time position must also be vacated. If one is granted leave from the main position, the question of whether the part time position can be held will be evaluated by the Head of institute.

According to the regulations at the Faculty of Medicine, the person appointed will lead and initiate research, supervise researchers, participate in teaching students and research fellows and undertake duties in connection with examinations, as well as undertaking administrative tasks as required by the prevailing regulations. The faculty is responsible for teaching (including conducting examinations) for the programs of professional study in medicine/dentistry and the faculty's bachelor and master programs. The faculty is also responsible for providing organized research training. The professorial duties include teaching these groups, including non-subject specific supervision tasks in accordance with the current needs of the faculty, within the guidelines for working hours in professorial positions. The person appointed is expected to participate in adjudication committees for PhD theses, assessment committees regarding appointments and competence promotions, and to take the role as acting dean in disputations.

The applicant must hold an MD and have sufficient clinical experience from work with relevant patient groups within cardiology and general internal medicine to teach medical students broadly within these fields of medicine.

High ambitions and quality of teaching, research and communications is expected. The successful applicant will provide a plan for development of her/his research, and for acquiring externally funded research projects. High quality of research, and publishing in peer-reviewed international journals is expected. The applicant is asked to describe his/her research profile, with respect to strategic plans and existing research at the institute/department.

Strong interpersonal skills and the ability to create an attractive research environment will be emphasized. Active collaboration, also interdisciplinary and internationally is expected.

The basis for the assessment of the applicant will include the education and training, scientific production and quality, professional and academic experience, teaching experience and qualifications as well as the documented experience in administration and management. As part of the ranking of qualified applicants, the full scope of these qualifications will be explicitly assessed. Particular weight will be attached to qualifications that are central to the job description. Recent scientific qualifications will carry more weight than other qualifications. Originality and innovation will be given priority before volume, and recent publications will be weighted higher than older.

In the final review and recommendation, emphasis will be laid on skills related to the job description, the evaluation done by the assessment committee, evaluation of personal suitability for the position based on interviews and references obtained, pedagogical qualifications and ability to disseminate scientific knowledge, plans for further research and ambitions for his/her teaching.

Applicants, who at the time of appointment cannot provide documentary evidence of basic teaching competence, must acquire such competence in the course of a period of two years.

Applicants who are not competent in Norwegian, Swedish or Danish must acquire such competence within two years subsequent to their appointment, and must be competent in English in the interim period.

As a main rule, interviews will be held and references collected. Applicants may also be required to give a trial lecture.

The University of Oslo wishes to appoint more women to permanent academic positions. Women are encouraged to apply. The University of Oslo also wishes to appoint more people from ethnic minorities to permanent academic positions. Women and minorities are encouraged to apply.

The University of Oslo has an intellectual property agreement that applies to all employees, with the aim of securing rights to research results etc.
