Professor II/Associate Professor of Medicine (Nephrology) at the Institute of Clinical Medicine, University of Oslo, combined with a full-time Senior Consultant position at the Department of Nephrology, Division of Medicine, Oslo University Hospital Ullevål. Internally funded.

The Institute of Clinical Medicine has a vacant position as Professor II/Associate Professor at the Department of Nephrology, Division of Medicine. The part-time professorship (20%) is combined with a full-time (100%) senior consultant position at Oslo University Hospital.

The Department of Nephrology teach and conduct research in renal diseases, dialysis, chronic kidney disease, renal failure and hypertension. The Department is responsible for the teaching of medical students at different levels of the curriculum. Teaching is being performed at the three major hospitals at Oslo University Hospital (Aker Hospital, Rikshospitalet and Ullevål Hospital). It is therefore a prerequisite that the applicant is mobile and flexible.

The successful applicant is expected to work within the field of Nephrology. He or she must have extensive teaching and research competence at a national and international level and should present views and plans for the development of the specific field of expertise. Applicants are expected to have ongoing research activity within one or more of the major fields of nephrology, contribute actively to collaboration projects, and have high ambitions for future scientific development. Ability to create an attractive and stimulating academic environment within the department and to attract PhD students and postdocs is essential. The successful applicant is expected to continue and contribute to the cooperation between the Department of nephrology and the Center of Cardiovascular and Renal Research, OUS. International research contacts and ambitions to obtain external research funding is expected.

The main position and the part time position are combined. It is a requisition that the position holder has both positions. If the main position is left, the part-time position must also be vacated. If one is granted leave from the main position, the question of whether the part-time position can be held will be evaluated by the Head of Institute.

According to the regulations at the Faculty of Medicine, the person appointed will lead and initiate research, supervise researchers, participate in teaching students and research fellows and undertake duties in connection with examinations, as well as undertaking administrative tasks as required by the prevailing regulations. The Faculty is responsible for teaching (including conducting examinations) for the programs of professional study in medicine/dentistry and the faculty's bachelor and master programs. The Faculty is also responsible for providing organized research training. The professorial duties include teaching these groups, including non subject specific supervision tasks, such as PBL-groups (Problem Based Learning) in accordance with the current needs of the faculty, within by the guidelines for working hours in professorial positions. The person appointed is expected to participate in assessment committees for PhD theses, assessment committees regarding appointments and competence promotions, and to take the role as acting dean in disputations.

Applicants must hold an MD and possess sufficient experience in nephrology and internal medicine to teach medical students broadly within the various fields of the specialities. High ambitions and documented quality of teaching, research and communication are expected. The successful applicant will have a plan for development of her/his research, and for acquiring externally funded research projects. High quality of research, and publishing in peer-reviewed international journals is expected.
The applicant is asked to describe his/her research profile, with respect to strategic plans and existing research at the institute/department. Within 6 months after appointment the successful candidate must provide a 3 year plan for future research in line with the department’s strategic priorities. The plan is to be presented for the head of department.

Strong interpersonal skills and the ability to create an attractive research environment will be emphasised. Active collaboration, also interdisciplinary and internationally is expected.

The basis for the assessment of the applicant will include the education and training, scientific production and quality, professional and academic experience, teaching experience and qualifications as well as the documented experience in administration and management. As part of the ranking of qualified applicants, the full scope of these qualifications will be explicitly assessed. Particular weight will be attached to qualifications that are central to the job description. Educational and scientific qualifications will carry more weight than other qualifications. Originality and innovation will be given priority before volume, and recent publications will be weighted higher than older ones.

In the final review and recommendation, emphasis will be laid on skills related to the job description, the evaluation done by the assessment committee, evaluation of personal suitability for the position based on interviews and references obtained, pedagogical qualifications and ability to disseminate scientific knowledge, plans for further research and ambitions for his/her teaching.

Applicants, who at the time of appointment cannot provide documentary evidence of basic teaching competence, must acquire such competence in the course of a period of three years.

Applicants who are not competent in Norwegian, Swedish or Danish must acquire such competence within two years subsequent to their appointment, and must be competent in English in the interim period. As a main rule, interviews will be held and references collected. Applicants may also be required to give a trial lecture.

The University of Oslo wishes to appoint more women to permanent academic positions. Women are encouraged to apply.

The University of Oslo also wishes to appoint more people from ethnic minorities to permanent academic positions. Women and minorities are encouraged to apply.

The University of Oslo has an intellectual property agreement that applies to all employees, with the aim of securing rights to research results etc.
